While in the Chaco the Terena also claim to have cultivated bananas and sugarcane, perhaps obtaining these plants from the Spaniards. The Terena word for banana is *panana*, which seems to indicate a rather recent date for this plant. The Terena word for sugarcane, *caiána*, also points to the recent adoption of this plant.

Other crops cultivated were pumpkins, *kame*; beans, *kareoké*; tobacco, *chaki*; and cotton, *nevoi*. Tobacco leaves, when mature, were picked, rolled so as to squeeze out the moisture, and dried. The rolling was repeated several times. Tobacco was smoked in clay pipes. Cotton, of course, was spun into yarn and used for weaving cloth.

DOMESTIC ANIMALS AND BIRDS

The Terena had medium-sized short-haired dogs. Parrots, macaws, and rheas were kept for their feathers. Horses, *kamo*, and cattle, *vaka*, were acquired in raids, the horses being used for warfare and hunting. Cows appear not to have been milked but, no doubt, augmented the meat supply. Cows and oxen were used for riding, the animal being guided by a bridle attached to a ring in the animal's nose. Saddles, *nikokoróti*, for both horses and cattle, were made from dried banana leaves by tying two cylindrical bundles together so that the bundles would rest, one on each side of the animal's backbone, no stirrups being used.

MANUFACTURES

The Terena made baskets, fans, and hats from thin strips of bamboo, "carandá," and from "piri." The thin outer layer of the wild bamboo was cut into narrow strips from which large and small baskets were made by plaiting. Large baskets were carried on the back with the aid of a tumpline. From "piri" and "carandá" fibers, hats and fans were made, the fans being used for killing mosquitoes and for maintaining small cooking fires.

The Terena also used netted bags of various sizes for carrying and storing food and other objects. The string used was made from the fibers of the *yulú* plant (probably a species of *Bromelia*). The leaves of the *yulú* were first soaked in water to soften the cells surrounding the fibers, the soft substance being later scraped away with a wooden knife. The fine fibers were then twisted into string, *ihe*, on the thigh or spun on a wooden spindle.
